Cleaning Technology

Spray a small amount of Clean without Water and apply gently without rubbing. Its formulation removes and dissolves dirt, dust, etc., leaving a protective layer on the surface that is reinforced each time it is reapplied.

You should not mop the floors with Clean without Water. It leaves a protective layer that repels dirt, it is not slip.

Instructions for use:

Always use a clean, dry microfiber cloth.

Fold the microfiber cloth into 4 parts.

Spray a small amount of Clean without water directly on the surface to be cleaned.

Use each clean part of the microfiber as you remove dirt, dust, grease, etc.

In the case of cleaning electronic equipment such as a flat screen, computer, biomedical equipment or dusting any surface, spray a small amount of Clean without water directly on the microfiber cloth.
